

### **Statement of circumstances for exclusive and non-exclusive milk supply agreements**

Freedom Foods has entered into sufficient milk supply agreements to meet our current and forecast demand for milk in the July 2020 to June 2021 (**FY 2021**) financial year. If our intake requirements for milk changes during FY 2021, the following points outline the circumstances in which Freedom Foods would enter into the standard form milk supply agreements published on our website.

- The farm must hold a current food safety licence or accreditation from the relevant State regulatory authority.
- The farm must be located within 250km of our Shepparton site at 1/102 Old Dookie Road, Shepparton, Victoria.
- The collection point must be accessible for milk to be collected by a 19 metre B-Double tanker at a minimum.
- The farm business must be a large scale, professional and best practice commercial operation.
- The farm must provide evidence that their milk supply in the previous 12 month period has been of consistently high quality.
- The farm must be willing to be a partner to our business, including hosting visits from third parties (such as investors in Freedom Foods, customers of Freedom Foods, and Freedom Foods personnel) on reasonably short notice.
